

About BCIA

The Biofeedback Certification Institute of America (BCIA) was created in 1981 with the primary mission to certify individuals who meet education and training standards in biofeedback and progressively re-certify those who advance their knowledge through continuing education. To reflect our global identity, the new name was adopted in March, 2010. BCIA is an autonomous nonprofit corporation. BCIA policies and procedures are set by an independent board of directors, comprised of a rotating group of distinguished biofeedback clinicians, researchers, and educators.

In 1996 the Board of Directors of the Biofeedback Certification Institute of America and the Academy of Certified Neurotherapists collaborated to develop a specialty certification in EEG Biofeedback to be managed and administered by BCIA. The opportunity to certify through the grandparenting process ended on December 31, 1997. Since 1998 the formal certification program in EEG Biofeedback has been available. The title was officially changed to Neurofeedback in 2008.

Board certification is the mark of distinction for providers of neurofeedback services. Recertification at four-year intervals indicates providers have undergone continuous peer review of ethical practice and have continued to acquire knowledge of recent developments in the field. Names of certified practitioners may be found on the BCIA Web site.

Board certification establishes that the individual has met entry-level requirements for the clinical practice of neurofeedback; however, BCIA certification is not a substitute for a state sanctioned license or other credential to practice one's profession. Candidates for certification who do not hold a professional license or its equivalent must stipulate that they practice under the supervision of a licensed provider when treating a medical or psychological disorder.

BCIA also provides certification programs in Biofeedback, including EMG and thermal modalities, and in Pelvic Muscle Dysfunction Biofeedback to treat elimination disorders and pelvic pain syndromes. Please contact BCIA for information on these programs.

The Biofeedback Certification International Alliance

(formerly the Biofeedback Certification Institute of America)

Benefits of Board Certification in Neurofeedback

The Biofeedback Certification Institute of America (BCIA) was formed in January 1981 to establish and maintain professional standards for the provision of biofeedback services and to certify those who meet these standards. To reflect our global identity, the new name was adopted in March, 2010.

- **BCIA provides the credential of acknowledged expertise in the specialized area of biofeedback.**
- **Board certification provides improved stature for the field and recognition among peers.**
- **Employers frequently request information on specialty training and credentials for job descriptions.**
- **Insurance companies frequently request BCIA certification information for reimbursement of claims.**
- **Some states require BCIA certification for Worker's Compensation coverage for biofeedback services.**
- **BCIA certification is recognized by the Association for Applied Psychophysiology and Biofeedback (AAPB) and the International Society for Neurofeedback and Research (ISNR) as the standard in the field.**
- **Listing of practitioners on the BCIA Web site provides a valuable resource for client referrals.**

Requirements for Neurofeedback Certification

Prerequisite Education

Candidates are required to hold a bachelor degree or higher from a regionally accredited academic institution, in a BCIA approved health care field. Licensed RNs are accepted with an A.A. degree. BCIA approved health care fields include: psychology, nursing, (including two-year registered nurses with license, not LVNs or LPNs), physical therapy, respiratory therapy, occupational therapy, social work, counseling, rehabilitation, chiropractic, recreational therapy, dental hygiene, physician's assistant (with certification or license), exercise physiology, speech pathology, and sports medicine. The following fields require a master's degree: music therapy and counseling education (M.Ed. in counseling). Appropriately credentialed doctors of medicine and dentistry are also accepted. Credentialed special education teachers may be certified to work in educational environments. Degrees in health care fields other than those listed above must be submitted to the Certification Review Committee.

Didactic Neurofeedback Education - 36 Hours

Candidates can meet this requirement by 1) completing a three semester-hour university course or its equivalent, 2) completing a BCIA accredited training program, or 3) earning thirty-six hours of BCIA approved workshop credits. Didactic education must cover the following BCIA Blueprint of Knowledge areas:

		<u>Required Hours</u>
I	Orientation to Neurofeedback	4
II	Basic Neurophysiology & Neuroanatomy	4
III	Instrumentation & Electronics	8
IV	Research	2
V	Psychopharmacological Considerations	2
VI	Treatment Planning	12
VII	Professional Conduct	4
		36

Practical Neurofeedback Training - 25 contact hours with a BCIA approved mentor to review:

- 10 sessions of personal neurofeedback, demonstrating self-regulation
- 100 sessions of patient/client treatment
- 10 case conference presentations.

**sessions are a minimum of 20 minutes.*

Human Anatomy/Physiology Course

A comprehensive course in human anatomy, physiology or human biology, or neuroanatomy from a BCIA accredited program or a regionally accredited academic institution fulfills this requirement.

License/Credential for Independent Practice

When treating a medical or psychological disorder, you are required to hold a current health care license in a BCIA approved health care field, issued by the state in which you practice or agree to work under the supervision of an appropriately credentialed health care professional.

Written Examination

A three-hour objective examination covering the Blueprint areas is required of all candidates. Examinations are offered in various locations or by special exam using a proctor for an additional fee.

Sequence for Meeting Certification Requirements

An individual becomes a candidate for certification by submitting an application with documentation of the educational prerequisite and payment of a filing fee. BCIA recommends, but does not require, that candidates complete the remaining requirements in the order: 1) anatomy/physiology course, 2) didactic neurofeedback education, 3) mentored clinical neurofeedback training, and 4) written exam.

Fees

Applications may be filed for \$125, with a balance of \$275 paid before sitting for the written exam. All fees must be paid by check, money order, or credit card in US currency. Applications are valid for two years.

Certification by Prior Experience

Appropriately licensed health care professionals who can demonstrate at least 100 ce hours and 3,000 patient/client hours.

Academic & Technician Certifications – New in 2010!

Academic certification is for those who use neurofeedback in educational, research or supervisory settings.

Technician certification is for those who are working under a BCIA certificant or other legal supervision to treat medical/psychological disorders.
