

## **BCIA BOARD THANKS DR. DOUG DEGOOD FOR YEARS OF SERVICE**

Dedicated Service for 12 years

Dr. Douglas E. DeGood joined the BCIA Board in 1995 and served in various capacities prior to being elected to the position of Chair. His dedication to the field of biofeedback fueled many volunteer hours of dedicated labor.

During his tenure with BCIA, Dr. DeGood brought a sense of continuity as he worked on such important projects as the refinement of the written certification exams, blueprint revisions, ethics, and certification review. He has left us with a legacy of honoring the importance and value of certification.

Dr. DeGood received his PhD in Clinical Psychology in 1971 from Florida State University and completed a pre-doctoral clinical psychology internship at Wayne State University School of Medicine. He later held faculty positions at the University of Pittsburgh and Auburn University where he did most of his early research in biofeedback, specifically clinical applications for pain management. Dr. DeGood has published and taught extensively in this area. Dr. DeGood is on staff at the University of Virginia School of Medicine and the Augusta Pain Management Center.

Our sincerest thanks and gratitude...
