

## Neurofeedback Practitioner Ad

### **Job Summary**

Georgetown Psychology Associates is looking for a neurofeedback practitioner to join our growing neurofeedback practice. Responsibilities of the successful applicant include supportively engaging with clients, running neurofeedback sessions, recording patient observations, administering psychological questionnaires, and maintaining client files. Full-time employees will also have the opportunity to engage in psychotherapy and administer psychoeducational evaluations.

Visit our website at: <https://www.georgetown-psychology.com>

### **Qualifications and Skills**

Previous neurofeedback experience is encouraged, but not required. Preference will be given to a BCIA certified provider or to an individual who is willing to be certified within 1 year of employment.

Required education: Masters or Doctoral Degree in Clinical Psychology or related field

### **Benefits**

- Competitive full-time and part-time salaried positions
- Bonus opportunities in addition to salaries
- A full range of insurance benefits for full-time staff: health, dental, and vision
- IRA program for full-time staff
- Competitive number of vacation and sick days
- Paid CE opportunities each year
- Paid neurofeedback training (4-day course)
- Paid professional liability insurance
- Weekly staff consultation meetings in addition to other opportunities for consultation among colleagues within and outside of the practice
- Weekly supervision meetings with our board certified neurofeedback practitioner
- Administrative and scheduling support
- Beautiful office space in the heart of Georgetown, Bethesda, and McLean
- Certification in neurofeedback is available
