

Alpha NeuroHealth Clinic

Partners for Positive Change

Alpha NeuroHealth Clinic (ANC) is a private mental health practice specializing in qEEG brain mapping and neurofeedback, located in beautiful St George Utah and expanding into Salt Lake City. Our group is comprised of several licensed professionals using cutting edge technology and integrative approaches for the best client care. We serve clients ages 8 to 80 with a wide range of challenges. We specialize in providing comprehensive, non-invasive, research-based solutions for people living with a broad range of issues, including anxiety, PTSD, OCD, ADD & ADHD, addictions after recovery program, trauma, eating disorders, mild TBI, depression, and performance issues.

Alpha NeuroHealth Clinic (ANC) has the following opportunities for a licensed Utah provider.

- St George, Utah: Licensed Counselor/Mental Health Professional (LCSW, LMSW, LPC)
- Salt Lake City, Utah: Licensed Counselor/Mental Health Professional (LCSW, LMSW, LPC)

ANC is currently seeking a licensed Mental Health Professionals with a passion for helping others who have experienced developmental, neurological, trauma or social struggles. Training will be provided if needed for certain procedures. If applicant is not yet certified with BCIA, mentoring will be given to support certification requirement within 6 months of contract. This position also requires an ability to handle administrative work such as scheduling and billing. After training and credentialing, this position will work with our neurofeedback services, so experience in qEEG and Neurofeedback is preferred. Our ideal applicant is a motivated and compassionate clinician with a desire to work closely with our team to provide exceptional services to our clients. Must be highly organized and very comfortable with both people and technology. They must be able to work independently, self-motivated, and creatively collaborate with growth and marketing strategies.

Clinicians in our offices are enrolled as W2 employees as well as 1099. The successful candidate will be expected to take an active role in program development, marketing and clinical knowledge acquisition when not engaged in direct services.

Candidates who meet our minimum qualifications should submit a cover letter describing interest and fit for this opportunity along with resume to Randy Christensen at Randyc@AlphaNeuroHealth.com, 435-574-5590. Preference will be given to those with a valid BCIA certification (BCN) or willing to earn certification within 6 months to 1 year of employment. Job Listings – February 2020
